

Grok Automation Prompts

STEP 1 – IDEA GENERATOR PROMPT :

(“If you don’t know what to write in the customization section, first use the Idea Generator prompt, then paste its output into the Automation Template.”)

Act as a creative story developer and cinematic world builder.

I want you to generate a complete story concept for an AI animated video.

Provide the following clearly structured sections:

1. STORY TITLE
2. STORY SUMMARY (3–5 lines)
3. MAIN CHARACTER 1 (full detailed physical description)
4. MAIN CHARACTER 2 (full detailed physical description)
5. OPTIONAL ADDITIONAL CHARACTER (if needed)
6. ENVIRONMENT / WORLD DESCRIPTION (lighting, mood, location)
7. SUGGESTED ANIMATION STYLE
8. SUGGESTED ASPECT RATIO (16:9 or 9:16)

Theme preference:

[Write your theme here — for example: friendship, adventure, motivational, kids moral story, sci-fi, fantasy, etc.]

Keep it cinematic, emotionally engaging, and suitable for AI text-to-video generation.

UNIVERSAL MASTER TEMPLATE (Editable Version)

(visual-only, like snail version)

Act as a professional cinematic storyboard director and AI video prompt engineer.

Your task is to generate exactly 20 detailed text-to-video prompts that together form one continuous cinematic animated story.

=====

USER CUSTOMIZATION SECTION

(Only edit the fields inside brackets)

=====

STORY TITLE:

[Write your story title here]

STORY SUMMARY:

[Briefly describe your story idea in 2–3 lines]

MAIN CHARACTER 1:

[Describe character in full detail: species/human, colors, clothing, facial features, body type, animation style]

MAIN CHARACTER 2:

[Describe second character in full detail]

OPTIONAL ADDITIONAL CHARACTER:

[If needed, describe here. Otherwise remove this section.]

ENVIRONMENT / WORLD:

[Describe the world clearly: location, time of day, lighting style, art style, mood]

ANIMATION STYLE:

[Example: Pixar-style 3D, Anime style, Realistic cinematic, Cartoon 3D]

ASPECT RATIO:

[Example: 16:9 cinematic, 9:16 vertical]

=====

DO NOT EDIT BELOW THIS LINE

=====

STRICT RULES – FOLLOW CAREFULLY:

1) STRUCTURE:

Follow this exact 20-scene cinematic arc:

- Scene 1–3: Introduction of environment and characters
- Scene 4–7: Inciting moment or first tension
- Scene 8–14: Rising development or conflict
- Scene 15–17: Turning point or emotional peak
- Scene 18–20: Resolution and satisfying ending

2) CHARACTER CONSISTENCY LOCK (VERY IMPORTANT):

Repeat the exact physical description of each character in EVERY scene.

Do NOT change:

- Colors
- Clothing
- Facial features
- Body proportions
- Art style
- Species

- Accessories

3) ENVIRONMENT CONSISTENCY LOCK:

Maintain the exact same environment style, lighting tone, and art direction across all 20 scenes.

4) CINEMATIC REQUIREMENTS:

Each scene must include:

- Camera angle
- Lighting description
- Mood
- Motion description
- Environmental detail

5) CONTINUITY LOCK:

At the end of EACH scene, add this exact line:

“Same character design, same environment style, continuous cinematic scene from previous shot.”

6) Each scene should feel like approximately 8–10 seconds of cinematic action.

7) OUTPUT FORMAT:

- Provide EXACTLY 20 prompts.
- Put ALL prompts inside ONE single copy-paste code block.
- No explanations outside the block.

UNIVERSAL MASTER TEMPLATE (WITH NARRATION VERSION)

Act as a professional cinematic storyboard director and AI video prompt engineer.

Your task is to generate exactly 20 detailed text-to-video prompts that together form one continuous cinematic animated story WITH embedded narration and optional dialogue.

=====

STRICT RULES – FOLLOW CAREFULLY:

1) STRUCTURE:

Follow this exact 20-scene cinematic arc:

- Scene 1–3: Introduction
- Scene 4–7: First tension or event
- Scene 8–14: Development or conflict
- Scene 15–17: Turning point
- Scene 18–20: Resolution

2) CHARACTER CONSISTENCY LOCK (VERY IMPORTANT):

Repeat the exact physical description of each character in EVERY scene.

Do NOT change:

- Colors
- Clothing
- Facial features
- Body proportions

- Art style
- Species
- Accessories

3) ENVIRONMENT CONSISTENCY LOCK:

Maintain the exact same environment style, lighting tone, and art direction across all 20 scenes.

4) EACH SCENE MUST INCLUDE:

- Detailed cinematic visual description
- Camera angle
- Lighting description
- Mood
- Motion description
- Environmental detail
- A Narration line labeled clearly as:

Narration: "..."

- Optional short Dialogue line labeled clearly as:

Dialogue – [Character Name]: "..."

5) IMPORTANT NOTE:

Narration and dialogue are for script guidance. Voice consistency may vary in AI video output.

6) CONTINUITY LOCK:

At the end of EACH scene, add this exact line:

“Same character design, same environment style, continuous cinematic scene from previous shot.”

7) Each scene should feel like approximately 8–10 seconds of cinematic action.

8) OUTPUT FORMAT:

- Provide EXACTLY 20 scene prompts.
- Put ALL prompts inside ONE single copy-paste code block.
- No explanations outside the block.
